

We urge the Commission to reconsider this proposed rule making and continue to allow licensed operation of FM translators. LPFM service will not provide adequate and essential radio coverage in rural areas of Nevada. Mountain ranges exceeding 7000 feet elevation will limit essential, public service radio coverage from LPFM. Mountain top FM translators have proven to ensure essential coverage.

We urge the Commission to retain FM translator service to permit continuation of service from, specifically, KLOV Christian broadcasting services. This broadcaster provides Christian format and content that is very important to our quality of life.

Thank you for consideration of our comments.
